

Mighty Mac[®]

Shredder/Chipper

- Large Chute
- Sturdy Leg
- Large Tires
- Heavy Gauge Steel
- 2 Engine Choices

Faced with leaf collection problems?

Mighty Mac's® leaf-shredder-chippers can get rid of those leaves fast.

LSC Series

LSC800/LSC1100

The LSC can be operated in an upright position, where leaves can be dumped directly into the large hopper, or in a lay-down position where all you need to do are rake leaves towards the hopper.

The powerful vacuum created by the direct drive hammerless shredding impeller pulls the leaves into the reduction chamber, providing up to 8 to 1 reduction!

Included with the unit is a 2.5-bushel collection bag for easy leaf disposal. The LSC can also chip branches up to 2-7/8" with its hardened and resharpenable tool steel knife. The balanced design of the unit distributed evenly over its large wheels makes movement easy, even over rough terrain.

The LSC, with either the 8.0 or 11.0 gross torque engine, provides the answer for landscape cleanup and beautification.

LARGE CHUTE

Accepts leaves in upright position or lying on ground level

LSC800

2 ENGINE CHOICES

To meet your needs

SOLID, HEAVY GAUGE STEEL

Fabrication for a lifetime of rugged use

LSC1100

UPRIGHT POSITION

For minimum storage

STURDY LEG

Folds back for ground level leaf feed

LARGE TIRES

For easy maneuverability
LSC800 - semi-pneumatic
LSC1100 - pneumatic
